

CEMENT REMOVER

DESCRIPTION

CEMENT REMOVER is a specially formulated cleaner that rapidly and effectively removes cement deposits. It is also suitable for use on ceramics and rubber floors to remove stubborn soils and marks.

FEATURES

- Highly effective
- Ready to use
- Removes unpleasant odours
- No harmful effect on drainage systems
- Can be diluted for removal of mild stains
- Very economical

APPLICATIONS & USAGE

1. **CEMENT REMOVER** should be applied to the stained surface by simple brushing with a brush. Leave for about 1-2 minutes for **CEMENT REMOVER** to work on the stains and then rinse off with water.
2. For very stubborn stains and soils, the process should be repeated.
3. For very mild stains or for daily maintenance, **CEMENT REMOVER** can be diluted at a rate of 1-part product to 2-5 parts of water.
4. **CEMENT REMOVER** is highly corrosive; precaution has to be taken to ensure that proper protective apparatus is worn when handling the product. This includes rubber gloves, splash goggles and apron etc.

SAFETY MEASURES

CEMENT REMOVER is a highly aggressive product. In the event of skin contact, flush immediately with running tap water. If irritation persists, seek medical attention at once.
