

## **D'BOND TANK CLEANER (WATER-BASED)**

### **DESCRIPTION**

**D'Bond Tank Cleaner (Water-based)** is a blend of biodegradable surfactants, water-soluble solvent and caustic soda. The product is to be diluted to 0.5% – 20% with water depending on the viscosity, thickness and type of soils. It does not corrode ferrous metals, non-ferrous metals and tank coatings. **D'Bond Tank Cleaner (Water-based)** has been evaluated by the PPR Sub-Committee and found to have met the requirements of regulation 13.5.2 of MARPOL Annex II.

### **FEATURES & BENEFITS**

- Effective and economical cleaner
- Can be diluted with water
- Not flammable
- Low toxicity
- Approved by IMO
- Can be used for:
  - Cleaning of dirty decks and other areas
  - Cleaning dirty bilges
  - Contaminated coastal areas
  - Cleaning of tanks carrying chemicals and vegetable oils

### **APPLICATION & USE**

It has to be diluted to 0.5% – 20% by adding water depending on the viscosity, thickness, nature of the soils.

For flat surfaces, it can be applied by mop or brushes.

For the large vertical surface, it can be applied by spraying with pressure pump. Allow 15 – 30 minutes for the product to penetrate the soils and then rinsed with hot water at preferably 50°C or room temperature water from a pressure pump.

### **TECHNICAL SPECIFICATION**

Appearance	: Clear liquid
Flash Point	: No
Solubility in Water	: Soluble in water
pH	: 11 – 13
