

D'BOND TANK CLEANER (SOLVENT-BASED)

DESCRIPTION

D'Bond Tank Cleaner (Solvent-based) is specially compounded to provide effective and high power cleaning. It is a blend of hydrocarbon solvents and biodegradable surfactants. It possesses high penetrating power and good solvency. It can be used to clean high viscous soya lecithin, vegetable oils, animal fats, soot and other fats that are not easily removed by water-based cleaners. **D'Bond Tank Cleaner (Solvent-based)** has been evaluated by the PPR Sub-Committee and found to have met the requirements of regulation 13.5.2 of MARPOL Annex II.

FEATURES & BENEFITS

- Cost effective
- High flash point
- Powerful cleaner
- Does not corrode metal tanks
- Approved by IMO

APPLICATION & USE

D'bond Tank Cleaner (Solvent-based) may be applied by using the recirculation method.

A make-up dilution rate of 3% – 20% with water is recommended. The emulsion is then heated to 65°C – 75°C and then circulated throughout the tank for cleaning.

TECHNICAL SPECIFICATION

Appearance : A clear liquid
Specific Gravity : Approx. 0.8
Flash Point : Above 65°C

PRECAUTION

Before using **D'bond Tank Cleaner (Solvent-based)** always read and follow precautions and directions for use as prescribed on container label.
